
NOVO E-INVOICE

Automated Invoice Processing

Book a **DEMO** now!

AUTOMATED INVOICE PROCESSING - MADE EASY!

With **NOVO E-Invoice**, you can process incoming invoices fully automatically – regardless of the format. The solution recognizes, classifies and processes all formats efficiently and reliably, including E-invoices like CII, Factur-X, XRechnung or other EN16931-compliant formats as well as PDF and scans of paper invoices in one seamless workflow. This enables:

- **Automated processing and analysis** of various (e-)invoice formats
- **Accelerated invoice verification** and **full compliance** with legal requirements
- **Seamless integration** into existing approval processes and ERP, DMS, and workflow systems

Incoming invoices → Reading, analysis, and extraction of relevant data → Transfer to target systems

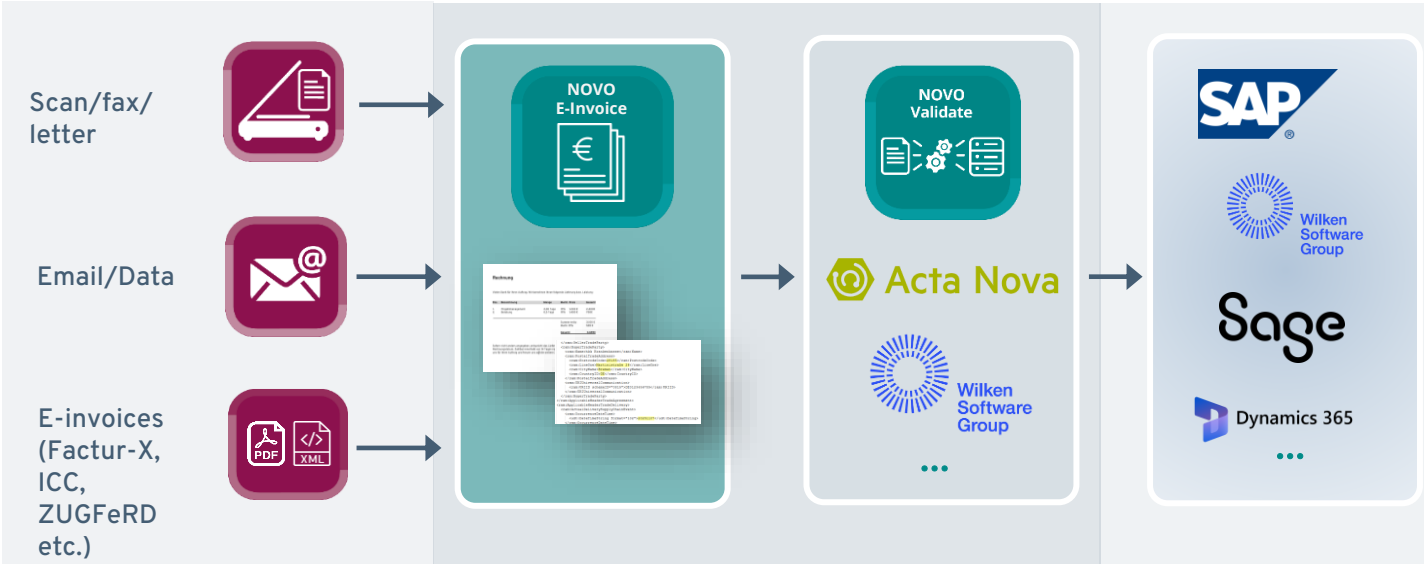
HOW DOES NOVO E-INVOICE WORK?

NOVO E-Invoice automates your incoming invoices in a few simple steps:



1. Receiving the invoice

Incoming invoices are received via connected input channels such as email inboxes or scan lanes.

2. Processing, verification, and approval

The documents are **classified** and relevant information is **extracted** using AI, LLM, OCR, or semantics. Before being **approved**, the data undergoes invoicing rules and can be validated and compared with master data in case of discrepancies.

3. Export

The validated and normalized data is seamlessly transferred to existing ERP, archive, and other systems (e.g., SAP, Sage, etc.).

VALIDATION & COMPLIANCE

NOVO E-Invoice checks incoming invoices for both formal and factual correctness. The included validation solution **NOVO Validate...**

- checks formal requirements in accordance with local legislation,
- reliably identifies discrepancies,
- verifies invoice data against your master data,
- and enables targeted manual error correction.

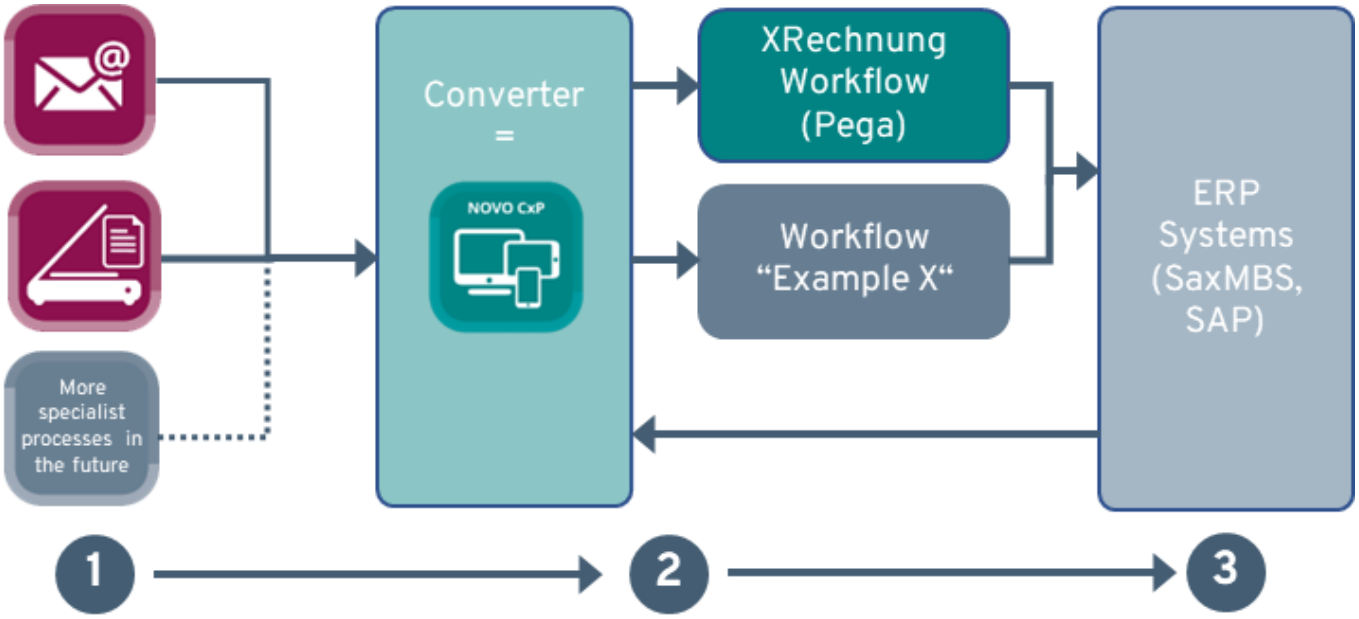
CASE STUDY: INVOICE PROCESSING AT THE SAXON STATE MINISTRY OF FINANCE

STAATSMINISTERIUM DER FINANZEN | Freistaat SACHSEN

The **Saxon State Ministry of Finance** has completely digitized and automated its invoice processing with inovoo.
All incoming invoices that are not yet in the EN16931-compliant XRechnung format are **automatically digitized and processed.** Processing is now carried out in a **structured, continuous process:**



Receiving the invoice:
Incoming invoices are received via the connected email inboxes and scan routes of the departments.

Processing:
Relevant information is extracted, enriched with address data from a central database, and stored together in XRechnung format (EN16931-compliant).

Export:
The data is transferred to the approval process and logged in an MS SQL database.
